

Basic grid for Up.

Print the grid to whatever size you are comfortable working in and save it. Put your paper over the grid and trace what you need for your page. Put grid away and use it again later.

How to use the grid:

Crop line: all artwork outside the crop line will be removed. full bleed art should extend past the crop line. (this rule is strict the others not so much)

Panel Line: Panels should not extend past this line. Unless you want them to...

Grid: These are the guides that I use to create my layouts. You don't have to use it...
